

INTERNSHIP WEEKLY REPORT FORMAT

NUEVA ECIJA II ELECTRIC COOPERATIVE, INC. AREA 1

Week#: 3 <January 26-30, 2026>

STUDENT 1 NAME: RAYMOND S. LUNA

STUDENT 2 NAME: MARY ROSE DL. DOMINGO

Number of hours worked for the week: **40 hours**

Total number of hours worked since start of First Week Internship: **120 hours**

A. ACTIVITIES/DUTIES/FUNCTIONS PERFORMED

1. Document all activities for the week. Enumerate daily activities.
2. What were your accomplishments this week? Enumerate/describe all the tasks involved in your accomplishments.

January 26, 2026

- The day started with a flag ceremony. In the morning, we worked on organizing and exporting files and other documents from the 2025 Bidder's Accreditation Google Sheet. In the afternoon, we continued and completed the organizing and exporting of all related files. We also continued working on our project by adding new functions to the system and fixing existing errors.

January 27, 2026

- The day began with daily devotion and exercise. After that, we organized and encoded emails from the 2025 NEECO records. In the afternoon, we continued and finished organizing and encoding the remaining emails. We also continued working on the project, specifically focusing on the assistant user navigation module of the system, including the main dashboard and report navigation.

January 28, 2026

- In the morning, we helped in setting up the audio-visual equipment at TRV HALL for the meeting and helped with the tasks assigned to us. In the afternoon, we continued developing the project, and added a function that allows the creation of folders and the uploading of different types of files within the system.

January 29, 2026

- The day began with daily devotion and exercise. After that, we started the video editing for the birthday celebrants for the first week of February. We also created a soft copy in Excel of the bidder's offers. In the afternoon, we continued working on the assigned project and made further improvements to the system.

INTERNSHIP WEEKLY REPORT FORMAT

January 30, 2026

- In the morning, we evaluated the post-qualification requirements for the replenishment of line hardware and distribution transformers. We also finished editing the video for the birthday celebrants and attended a meeting with our supervisor regarding the updates needed for the system. During the meeting, feedback was provided on the features that needed to be fixed and improved. In the afternoon, we continued working on the project by fixing and improving the system based on the supervisor's requirements and recommendations.

B. KNOWLEDGE GAINED

1. What new learnings were gained during the week?
2. What skills were developed/enhanced?

During the week, we gained practical knowledge on how office records and technical documents are properly handled, organized, and maintained in a real working environment. We also learned how these documents are used for official processes such as bid openings and reportorial requirements. We further gained hands-on experience in system development, particularly in adding new functions, improving user navigation, and fixing system errors based on actual user feedback from the supervisor.

Our skills in data handling and organization were enhanced through the use of Excel for preparing bidder offers and through the careful encoding of records which required close attention to detail. Technical skills in basic debugging, system enhancement, and file management were also improved. Moreover, our communication, teamwork, and time management skills were strengthened through coordination with the supervisor, participation in meetings, and balancing multiple tasks within the limited time.

C. PROBLEMS ENCOUNTERED

1. What problems have you encountered this week?
2. How did you handle the problem?

One of the main challenges encountered during the week was handling multiple tasks at the same time, especially when administrative work such as organizing files, encoding emails, and preparing documents overlapped with system development tasks. Another challenge was dealing with system errors and bugs that occurred while adding new functions and improving navigation. Some features did not work as expected as first, which required additional time for testing, debugging, and revising the code.

These challenges were addressed by prioritizing tasks based on urgency and importance and by managing time more effectively throughout the day. We also consulted the supervisor whenever clarification was needed to ensure that system updates met the required standards. Through careful testing, reviewing errors, and making gradual improvements, we were able to resolve issues, enhance the system's functionality, and complete the assigned tasks as expected.

INTERNSHIP WEEKLY REPORT FORMAT

- D. PHOTO DOCUMENTATION FOR THIS WEEK OF THE ACTIVITIES PERFORMED FOR THE WHOLE WEEK (at least include 2 to 4 pictures of your weekly activity for this week, each picture has label of what you are doing)
